Compatibility of TDK Life on Record Protection Software on Flash Drives

Reference Number: **AA-00245** Views: **5347** Last Updated: **2015-10-13 12:54**

What logon modes of Windows are compatible with the TDK Life on Record protection software supplied with the drive?

The following matrix has been set up to clarify which modes of Windows operating systems are compatible with the various software applications used on TDK Life on Record USB flash devices. Reference the notes below the table to clarify entries.

Entries refer to Administrator and/or User mode for operation of the software on the device.

- Flash Lock is used on several TDK Life on Record non-encrypted drives.
- SW Encryption applies to the TDK Life on Record Secure products.
- HW Encryption applies to the TDK Life on Record Secure+ products.

<i>Windows Version</i>	<i>Flash Lock</i>	<i>SW Encryption</i>	<i>HW Encryption</i>
Windows 7 & 8	Admin & User	Admin & User	Admin & User
Windows Vista	Admin & User	Admin & User	Admin & User
Windows XP	Admin only ¹	Admin & User	Admin & User
Windows 2000	Admin only ¹	Admin & User	Admin & User

¹ When attempting to run the Flash Lock software in the Windows XP User Logon Mode the following message will be displayed:

"Please insert the device or run this utility as a privileged user."

It will be necessary to Logon to Windows as the Administrator to use the application software.

Note: None of the above listed software applications are compatible with Mac OS or Linux operating systems. Also, Flash Lock is not compatible with the encrypted products.
